

THE 100 MILLION MASK CHALLENGE

is a nationwide call to increase the production and distribution of much needed personal protective equipment for health care workers across the country.

Equipping the front lines

We are helping manufacturers, businesses, individuals and hospitals come together to rapidly produce needed PPE by:

Sharing design **specifications** and instructions to help manufacturers produce PPE quickly and effectively — we even have a team of experts on hand to assist manufacturers as they take this on.

Developing **HealthEquip**, an app that matches those wanting to donate PPE with hospitals that need it most.

Helping hospitals navigate PPE challenges by vetting non-traditional **suppliers** offering PPE.

Supporting the health care workforce

We are so grateful to our health care workforce and are going beyond PPE to ensure that they have what they need as they take on COVID-19. This includes partnerships to provide **discounts** for health care workers on hotel rooms, flights, food and other resources during this time.

We are also helping state, regional and metro hospital associations as they assist hospitals with growing **workforce** shortages.

Ways you can help

We know that so many of you share our gratitude for our health care work force and we have created ways you can help as well.

Our **Protect the Heroes** campaign allows you to make monetary donations to your local hospital or health system.

We have joined forces with **Give a Mask**, where your financial contribution will translate directly into masks for hospitals, providers and community-based organizations.

Thank you to all of our partners ...

KEARNEY
